

# Tutorial Proposal Template for DAI 2025 - Please change it to the title (and acronym) of the proposed tutorial

Proposals for tutorials should be about two (2) pages in length (this is not a hard constraint) in the DAI style.

## 1 DESCRIPTION OF TUTORIAL TOPIC

A brief introduction of the tutorial topic, identifying the specific areas on which the tutorial will focus.

## 2 DISCUSSION OF THE RELEVANCE OF THIS TUTORIAL

- What knowledge will be conveyed? What techniques/methods, concepts, or modelling frameworks will be presented?
- Why is the topic innovative/relevant?
- Who is the target audience of the tutorial (first-year PhD students?, experienced researchers?)
- A brief description of why the tutorial topic would be of interest to a substantial part of the DAI audience

## 3 TUTORIAL CONTENT AND FORMAT

A high level overview of the tutorial content, in the form of a point-form outline of the tutorial.

## 4 PRESENTERS

Please provide the following information:

- The name, affiliation, and email address of the presenter(s)
- A paragraph highlighting the presenter(s) expertise in the tutorial area, including highlighted publications/presentations
- Evidence of teaching experience (courses taught or references)
- Primary contact person

## 5 INFORMATION FOR THE WEBSITE AND COMMUNICATION PURPOSES

- A short abstract describing the tutorial. This can also include the target audience.
- A brief bio statement of the presenter(s)
- For each presenter, a link to a picture
